Dr. Trevor Steve Faculty of Medicine and Dentistry University of Alberta

BIO:

Dr. Steve completed medical school at the University of Saskatchewan before moving to Edmonton to begin a neurology residency at the University of Alberta. During his residency, he undertook (and eventually completed) a PhD focusing on MRI-based methods to measure the human hippocampus. He is currently an Assistant Professor at the University of Alberta with clinical interests in epilepsy, general neurology and urgent neurology.

TOPIC: Biomarkers for Alzheimer's Disease

Alzheimer's disease affects approximately 3% of the Canadian population and currently has no available disease-modifying treatments. Biomarkers for this condition are increasingly playing a critical role in clinical trials for new treatments. In this talk, Dr. Steve will review current and emerging biomarkers for Alzheimer's disease including those being investigating at the University of Alberta.
